Milton M. Hom OD FAAO : Manual of Contact Lens Prescribing and Fitting with CD-ROM, 2e before purchasing it in order to gage whether or not it would be worth my time, and all praised Manual of Contact Lens Prescribing and Fitting with CD-ROM, 2e:

Used together, the manual and CD-ROM provide the most comprehensive resource on prescribing and fitting of all

types of contact lenses. Students and practitioners alike will improve their evaluation and fitting skills using this unique tool. Video, animation, and morphing allow you to learn the skills of fluorescein pattern interpretation that are fundamental to correctly fitting patients with RGP contact lenses. Control the digitized video to examine subtle changes in fluorescein pattern repeatedly until the effect is understood. CD-ROM demonstrates how the concentration of fluorescein dye and eccentricity of the cornea affect the contact lens fit in a dynamic fashion.

improve illustrative material. excellent for students, as well as for review and resource for experienced clinicians. cd-rom is interesting- a bit challenging to install for a computer novice, but easy to use once done. excellent beginning text, cd rom is great! From the Publisher This highly regarded manual now includes a CD-ROM featuring over 40 video, morphing, and animation segments that accurately represent real situations. The CD-ROM provides students with a head start on how to fit contact lenses before actually treating patients. You can repeat or stop segments at any time to examine the image more closely, an ability particularly helpful when viewing fluorescein patterns to evaluate contact lens fit. The second edition includes eight new chapters and covers the uses of lenses in orthokeratology and refractive surgery. Used together, the manual and CD-ROM provide the most comprehensive resource on prescribing and fitting of all types of contact lenses. Students and practitioners alike will improve their evaluation and fitting skills using this unique tool.
