Milton M. Hom, Adrian S. Bruce : Manual of Contact Lens Prescribing and Fitting with CD-ROM before purchasing it in order to gage whether or not it would be worth my time, and all praised Manual of Contact Lens Prescribing and Fitting with CD-ROM:

1 of 2 people found the following review helpful. Book was not originalBy Eashwer P. SrinivasanI ordered this book for my sister. When my sister got it the book was not original. It was a Photo Copy of the original . I was very surprised when I saw it that way. Wonder why it got sent that way. Isn't it a copyright violation to do that ?0 of 2

people found the following review helpful. Excellent service...By A. Khoja This book came in excellent condition, with service in less than 2 weeks! Thank you!! =)

Written in a concise, practical, outline manner, *Manual of Contact Lens Prescribing and Fitting, 3rd Edition* follows the logical progression of patient care, from basic prefitting topics, through rigid lens, soft lenses and advanced/specialty issues. Valuable management information assists in fitting and problem-solving situations, and clinical pearls in every chapter highlight key points. The companion CD-ROM uses video, animation, and morphing to demonstrate the skills of movement and position that are necessary to correctly fit rigid contact lenses. Covers both rigid and soft contact lenses. Enhances the reader's understanding through video and animation on the CD-ROM. Begins with prefitting topics and ends with specialty topics, progressing logically as the optometrist would care for the patient. Two new chapters on patient selection and contact lens optics. Contributions from new authors and updating throughout to reflect the newest modalities and references. Thoroughly revised CD-ROM is more user-friendly for both the student and clinician, with additional color images and information on Soft Contacts and the Tear Film, Translating Bifocals (Multimedia), Keratoconus, and Post-Penetrating Keratoplasty.
