You'll strengthen your coding skills with exercises from Godfrey Medical's simulated medical practice Stop and Practice exercises, and additional exercises found in the student workbook and Evolve companion website. Visual and tear-out tools provide real applications for coding. Teachers benefit with a text that emphasizes actual patient record and documentation and is fully updated to reflect new codes and coding guidelines. In addition to fully updated content, the new edition has new content on anatomy

and physiology, expanded discussion of the use of the medical record in coding, streamlined coding tools, and improved examples. NEW Anatomy/Physiology/Terminology chapter prepares students for proper coding by providing a good understanding of these basic concepts. Smaller sections and improved flow of the text means students understand and master the information more easily. EXPANDED illustrations of sample patient charts with improved explanations of proper code assignment. Fully updated content, including new codes and coding guidelines. New focus on ICD-10 content for those instructors who want to prepare students for ICD-10 implementation. NEW Evolve companion website contains interactive coding exercises and other review exercises for students practice.
