**Beth A. Rich : Medical Coding: A Journey (MyHealthProfessionsLab Series)** before purchasing it in order to gauge whether or not it would be worth my time, and all praised Medical Coding: A Journey (MyHealthProfessionsLab Series):

Williams I simply thought I would try something new, and I can truthfully say I have taught Medical Billing and Coding classes with the seemingly same old un-information since 2007 and I always had to supplement that with so many handouts my students jokedly called me the 'paper queen'. Most medical billing and coding classes move very rapidly, and student have to catch-it while reading through a lot of information. This book is the BOMB!!!! It is written like a textbook should be, and they should be written with the STUDENT in mind. This textbook is such a breathe of fresh air ( and it empowers my students), my students can quickly grasp the important foundational concepts and conventions of ICD-9-CM, HCPCS Level I II coding and even ICD-10/10 PCS. Great job, extremely well written, all the important coding

issues are clearly discussed; needs a few updates because some codes did change since last year. From now on our school will be using this book, no need to look at any others. Thanks again for a great text. L M Williams, LVN NRCCS Allied Health Instructor

It is the correct text book for the class I'm reading. It is very helpful to have a hard copy as well as the e book.

Designed for the beginning student, **MEDICAL CODING: A JOURNEY** is a comprehensive textbook for learning and assigning diagnosis and procedure codes—including code sets that all U.S. healthcare providers and insurance companies are required to use. Highlighting ICD-10-CM, ICD-10-PCS, and ICD-9-CM (vol. 1, 2, and 3), as well as HCPCS and CPT-4, the book teaches code sets and addresses medical terms, medical specialties, medical records and healthcare issues. Examples, photos, and guidelines walk students through each step of the coding process and explain common medical procedures and diagnoses. Unique exercises use video, chart audits, online research, and medical record interpretation to reinforce coding skill and accuracy.
