Raymond S. Greenberg President M.D., Stephen R. Daniels M.D. Ph.D., W. Dana Flanders Professor M.D. DSc, John William Eley Associate Professor M.D. M.P.H., John R. Boring III Professor : Medical Epidemiology: Population Health and Effective Health Care, Fifth Edition (LANGE Basic Science) before purchasing it in order to gage whether or not it would be worth my time, and all praised Medical Epidemiology: Population Health and Effective Health Care, Fifth Edition (LANGE Basic Science):

0 of 0 people found the following review helpful. A must read for Doctors and Med school studentsBy Johnvery good book all dotors and staff should read this and take the class to understand what's happening in the world today.1 of 1 people found the following review helpful. Good purchase for my master programBy CarlosAll the chapters of the

book are fully new, the information is well explained. Good purchase for my master program.

Understand the role of epidemiology in clinical medicine for the best patient outcomes possible For nearly a quarter of a century, *Medical Epidemiology* has been the go-to text for understanding the principles and concepts of epidemiology and the relationship between population-based science and efficient patient care. It delivers the most current information on patterns of disease occurrence and risk factors all clearly linked to clinical practice through the use of Health Scenarios in every chapter. This edition of *Medical Epidemiology* has been completely rewritten to reflect the transformative changes in the manner in which epidemiologic methods are being utilized in today's healthcare as well as the major shifts that have occurred at the policy level. New chapters have been added on many timely topics, including global health, social determinants of health, health inequalities, comparative effectiveness, quality of care, variations in care, and implementation science. Increased information about evaluating, summarizing, and using evidence for improved patient care and outcomes gives this edition an even greater clinical focus.

About the Author Raymond S. Greenberg, MD, PhD is President of the Medical University of South Carolina. While nationally recognized for his cancer research, Dr. Greenberg has also authored nearly 150 scientific publications. Additionally, Dr. Greenberg is an active participant on several national scientific advisory boards.
