Quantitative and qualitative research methods are covered and guidance given on the entire research process - from literature researching, information management and literature evaluation, through to data collection, data analysis and writing up. Specific instruction is given on the structure and presentation of dissertations, writing articles for publication and on presentation skills for presenting at conferences.

"Medical Imaging and Radiotherapy Research is the first time a research text book has been published that specifically focuses on the radiographic profession..there is a wealth of information that will also be of use to practitioner radiographers who engage with evidence based practices on a daily basis."
