From World Scientific Publishing Company : Medical Imaging Systems Technology: Methods in General Anatomy (Medical Imaging Systems Technology) (v. 3) before purchasing it in order to gage whether or not it would be worth my time, and all praised Medical Imaging Systems Technology: Methods in General Anatomy

(Medical Imaging Systems Technology) (v. 3):

This scholarly set of well-harmonized volumes provides indispensable and complete coverage of the exciting and evolving subject of medical imaging systems. Leading experts on the international scene tackle the latest cutting-edge techniques and technologies in an in-depth but eminently clear and readable approach. Complementing and intersecting one another, each volume offers a comprehensive treatment of substantive importance to the subject areas. The chapters, in turn, address topics in a self-contained manner with authoritative introductions, useful summaries, and detailed reference lists. Extensively well-illustrated with figures throughout, the five volumes as a whole achieve a unique depth and breadth of coverage. As a cohesive whole or independent of one another, the volumes may be acquired as a set or individually. # Volume 3: # Medical Image-Based Preformed Titanium Membranes for Bone Reconstruction (V Pattijn et al.) # Automated Image Segmentation: Issues and Applications (A Pitiot et al.) # Detection and Segmentation of Drusen Deposits on Retina Images (Z Michalis et al.)
