**Janet I. Beik AA BA MEd : Medical Insurance Online for Health Insurance Today: A Practical Approach, 4e** before purchasing it in order to gage whether or not it would be worth my time, and all praised Medical Insurance Online for Health Insurance Today: A Practical Approach, 4e:

0 of 0 people found the following review helpful. Decent format for sometimes boring content. Lacks customer support.By Paul R.These two books were sold as a pair. One the text and the other a workbook. It also comes with the one-time use access code on a card inside. The instructional material was well written and in a practical way. It was in

an easy as it could be format. The first few chapters go fast. Then there comes some really boring material inside, especially about medical coding, but the text gets through it as best that it can be. I am glad I do not want to be a medical coder. The authors give plenty of practice exercises and review of each of the chapters. The textbook inside pages are printed on shiny paper and the workbook are a dull finish. The only big problem is with Elsevier is with the people that handle the student/customer (no) support. When I needed help and phoned the toll free number, usually the person on the other end had little knowledge on how to solve the problem that I was calling about. One guy was just plain rude. Online support was not much better. If you have to take this course, you may want to enroll in the classroom course and not the online. I finished the course this past week for Pharmacy Technician.

Newly revised to follow the 4th edition of Health Insurance Today, Medical Insurance Online is a practical, user-friendly online course that prepares you for a successful career as a health insurance professional. Eighteen online learning modules correspond to the 18 chapters in the text and offer short instructional segments followed by numerous application activities based on medical records from real-life case studies. You'll gain valuable experience with extracting information from the patient's chart, completing the CMS-1500, electronic claims filing, HIPAA, electronic health records, and the latest industry standards. Interactive exercises and activities including multiple-choice, matching, short answer, image analysis, true or false, and case studies offer multiple opportunities to recall and apply medical insurance concepts such as the cycle, organization, and completion of the claim form. Online modules correspond to each chapter of the text, making the course easier to follow. Medical records accompany training activities, challenging you to look for information in the medical record and practice abstracting relevant information from the patient's chart. An extensive glossary allows you to click on a term and read the definition at any time during the course. The text and online course connect seamlessly with engaging graphics, inviting elements, and vibrant colors, for a more interesting and educational experience. Automatically scored and graded quizzes and exams allow you to evaluate your mastery of each module's content. Clear directions help you navigate through the modules and complete the course. Reading assignments from the text for each lesson clearly connect textbook content with application and hands-on learning in the online course. Tell us what you think! At the end of the course, you'll be offered a brief survey regarding your opinion of the features and usability of the course. Your constructive feedback helps us continue to improve our online courses. Updated screens, content, and reading assignments correspond to Health Insurance Today, 4th Edition.
