American Diabetes Association : Medical Management of Pregnancy Complicated by Diabetes before purchasing it in order to gage whether or not it would be worth my time, and all praised Medical Management of Pregnancy Complicated by Diabetes:

0 of 0 people found the following review helpful. Great for the Advanced LearnerBy LauraI bought this book not even contemplating that it would be reader-friendly. It's a collection of articles from medical journals, so expect language that will confuse and confound those who are not familiar with advanced medical terminology. I had my dictionary open and USED IT! (well, I used Google and/or my dictionary app) For me this was VERY useful--realistic in it's

description of pregnancy complicated by Diabetes. Had it been more consumer-oriented it wouldn't be as...blunt, I guess is the word, in it's outlook. Lois Jevonivic is an amazing doctor and is well known and highly respected in her field. I will trust any work she comes out with.1 of 1 people found the following review helpful. Very ComplicatedBy CustomerThis book is not for everyone. It was written for doctors. If you are the type of person who enjoys taking charge of your diabetes (of course with the guidance of your medical team) then this is a good read. If you prefer to let the doctor manage it for you (not a bad choice, especially when pregnant) then don't bother, it will just frustrate.My endocrinologist recommended this book because I ask "Why?" a lot. It really helps me to know what standards the doctors are following.1 of 3 people found the following review helpful. Must have for Management in Diabetes during pregnancyBy Val FoxThis comprehensive manual has been a reliable resource for managing Diabetes in Pregnancy. Highly recommend for Medical providers, educators that are involved in patient management, program development and staff training for Diabetes in Pregnancy Programs.

Pregnancy complicated by diabetes is a medical challenge that can be minimized through a program of expert protocols and patient partnerships. This newly revised edition presents a complete package of these protocols that can help produce healthy infants in pregnancies complicated by type 1, type 2, and gestational diabetes.

About the AuthorAmerican Diabetes Association/Lois Jovanovic, MD, Editor Lois Jovanovic, MD (Santa Barbara, CA) is a respected endocrinologist specializing in diabetes in pregnancy.
