If you are entering a new profession as a medical office assistant or just need to refresh and hone your skills in the

front office, Medical Office Practice, 7e is a must. This simulation of working in a medical office will make you feel as if you are on the job. Daily tasks are assigned based upon the normal occurrence of these tasks in a real office setting. This natural progression of tasks helps bridge the gap from learning to actually being on the job, making your transition to the workforce seamless.

The information provided is both detailed and complete when introducing each new job to a new employee of a practice, as it should be without overkill. The information is explained in an organized and easy to follow manner. The activities build on one another in a logical fashion. . .The activities also are right in line with the current requirements for CAAHEP. I am looking forward to getting this new edition!"
