From American Institute of Physics : Medical Physics: Eighth Mexican Symposium on Medical Physics (AIP Conference Proceedings) before purchasing it in order to gauge whether or not it would be worth my time, and all praised Medical Physics: Eighth Mexican Symposium on Medical Physics (AIP Conference Proceedings):

The main purpose of this symposium is to stimulate the application of physics to medicine, both in practice and research. Recognized specialists, researchers, health professionals and students in this area present their results and/or the state-of-the-art techniques related to their current topics of interest in plenary talks and in oral and poster sessions. Topics include: biomagnetism, bioimpedance, digital mammography, tomography, MRI, optics in medicine, radiation therapy, dosimetry, conformal radiography, thermoluminescence, biomaterial characterization, image processing and instrumentation.
