Bonnie F. Fremgen, Suzanne S. Frucht : Medical Terminology: A Living Language (5th Edition) before purchasing it in order to gage whether or not it would be worth my time, and all praised Medical Terminology: A Living Language (5th Edition):

1 of 1 people found the following review helpful. Good For Independent StudyBy SaylorI found this book to be very helpful and easy to understand; the tests and "practice as you go" sections make it easy to test your skills in both remembering medical terms, common abbreviations, and forming terms yourself. My only complaint is that it's missing a well known and serious mental illness in the corresponding section: borderline personality disorder. I understand that they can't possibly cover all ailments, but it's common enough that I feel it should be included. I'm not sure if they're missing any others, but that was one I was surprised not to see. Otherwise, it's a good book and it was a great resource to prepare me for work as a patient care technician.3 of 3 people found the following review helpful. Good But Without Detail.By CCDI didn't buy this book brand new, but it seems like it is brand new! The book is very basic and easy to use for my class, but if you are looking for a more in-depth insight of the medical field I suggest a

different textbook. 1 of 1 people found the following review helpful. This book is good. By James E. Harris III It's so nice reading a technical manual that does NOT have grammar and spelling mistakes in it. This book is good for learning medical terminology. I'm in a class where this is the textbook, and it teaches a lot and is easy to follow and learn from.

Using a consistent, logical, and step-by-step approach, *MEDICAL TERMINOLOGY: A LIVING LANGUAGE*, 5/e introduces students to the anatomy and physiology of body systems and the corresponding medical terms related to them. For each body system, broad coverage of anatomy, physiology, pathology, diagnostic procedures, treatment procedures, and pharmacology is provided. The author emphasizes both terms built from Latin and Greek word parts, and modern English terms, helping students develop a full working word part vocabulary they can use to interpret any new term. This edition contains many new terms, and has been reorganized for more efficient learning. To eliminate confusion, Word Building tables have been removed from each chapter and the terms have been distributed throughout the pathology, diagnostic procedure, and treatment procedure tables, where they are more immediately relevant to students. Note: This ISBN is just the standalone book, if the customer wants the book/access card order the ISBN below; 133962032 / 9780133962031 *Medical Terminology: A Living Language PLUS MyMedicalTerminologyLab with Pearson etext -- Access Card Package* Package consists of: 0132843471 / 9780132843478 *Medical Terminology: A Living Language* 0133936236 / 9780133936230 *MyMedicalTerminologyLab with Pearson etext - Access Card - Medical Terminology A Living Language*

About the Author Bonnie F. Fremgen is a former associate dean of the Allied Health Program at Robert Morris College. She has taught medical law and ethics courses as well as clinical and administrative topics. In addition, she has served as an advisor for students' career planning. She has broad interests and experiences in the health care field, including hospitals, nursing homes, and physicians' offices. Dr. Fremgen holds a nursing degree as well as a master's in health care administration. She received her PhD from the College of Education at the University of Illinois. She has performed postdoctoral studies in Medical Law at Loyola University Law School in Chicago. Suzanne S. Frucht is an Associate Professor of Physiology at Northwest Missouri State University (NWMSU). She holds baccalaureate degrees in biological sciences and physical therapy from Indiana University, an MS in biological sciences at NWMSU, and a PhD in molecular biology and biochemistry from the University of Missouri--Kansas City. For 14 years she worked full-time as a physical therapist in various health care settings, including acute care hospitals, extended care facilities, and home health. Based on her educational and clinical experience she was invited to teach medical terminology part-time in 1988 and became a full-time faculty member three years later as she discovered her love for the challenge of teaching. She teaches a variety of courses including medical terminology, human anatomy, human physiology, and animal anatomy and physiology. She received Governor's Award for Excellence in Teaching in 2003
